Stage Configuration

Name	Class	Stage
setupStage1	RegisterTest	An object from the class Person that can register correctly -CC -79311987 Or -CC -79311977 Make sure the document isn't TI and that the second to last docNumber matches condition to register
setupStage2	RegisterTest	An object from the class Person that can't register correctly because it is underage -TI -1193393239 Make sure the document is TI
setupStage3	RegisterTest	An object from the class Person that can't register correctly because it's document number doesn't match the date -CC -66835275 Or -CC -66835285 Make sure the document isn't TI and doesn't match the condition

Test case design

Test Objective: Verify that the register method works accordingly depending on the person that is trying to register				
Class	Method	Stage	Entry Values	Results
Menu	register	setupStage1	docType= CC docNumber= 79311987 Or docNumber= 79311977	The person is registered successfully, added to the registered list, and the number of people that have tried to register is increased
Menu	register	setupStage2	docType= TI docNumber= 1193393239	The person isn't registered successfully and the number of people that have tried to register is increased.
Menu	register	setupStage3	docType= CC docNumber= 66835275 Or docNumber= 66835285	The person isn't registered successfully and the number of people that have tried to register is increased.
